THE COMPANY

St. Vincent Foundation raises funds from all over the community, including grateful patients and their families, corporate and foundation contributors, physicians, nurses and staff to benefit Peyton Manning Children's Hospital families in need of support at the St. Vincent House. Through Foundation funds, we are able to provide additional patient care for people who are sick and can't afford to pay for their own healthcare.

THE OBJECTIVE

St. Vincent House, a new facility supporting the Peyton Manning Children's Hospital families, needed help with everything from IT to equipment to security systems as they built a brand new facility. They weren't sure where to begin and needed a partner who understood their technical needs.

Van Ausdall & Farrar assessed the situation and began working with St. Vincent House to determine a plan of action. They worked with the construction teams to effectively prioritize all the needs of the new St. Vincent House, and generated multiple solutions that enabled everything to run smoothly before, during, and after construction.

THE STRATEGY

Since the St. Vincent House was brand new, their needs were vast. Van Ausdall & Farrar provided a variety of services, including Managed IT Solutions, Copy/Print Solutions, Network Solutions, Business Telephone Services, and Cloud Solutions. They worked closely with the St. Vincent House team during construction of their building, giving direction and expertise on where to place wiring and wall jacks for optimum efficiency, as well as digital signage direction and LCD equipment.

THE RESULTS

Thanks to the efforts of Van Ausdall & Farrar before, during, and after construction, St. Vincent House was up and running on time. Van Ausdall & Farrar maintains the equipment and solutions they implemented, which means St. Vincent House can manage their business efficiently and drive the heart of their business--taking care of patients' families.
