mᴏModal™
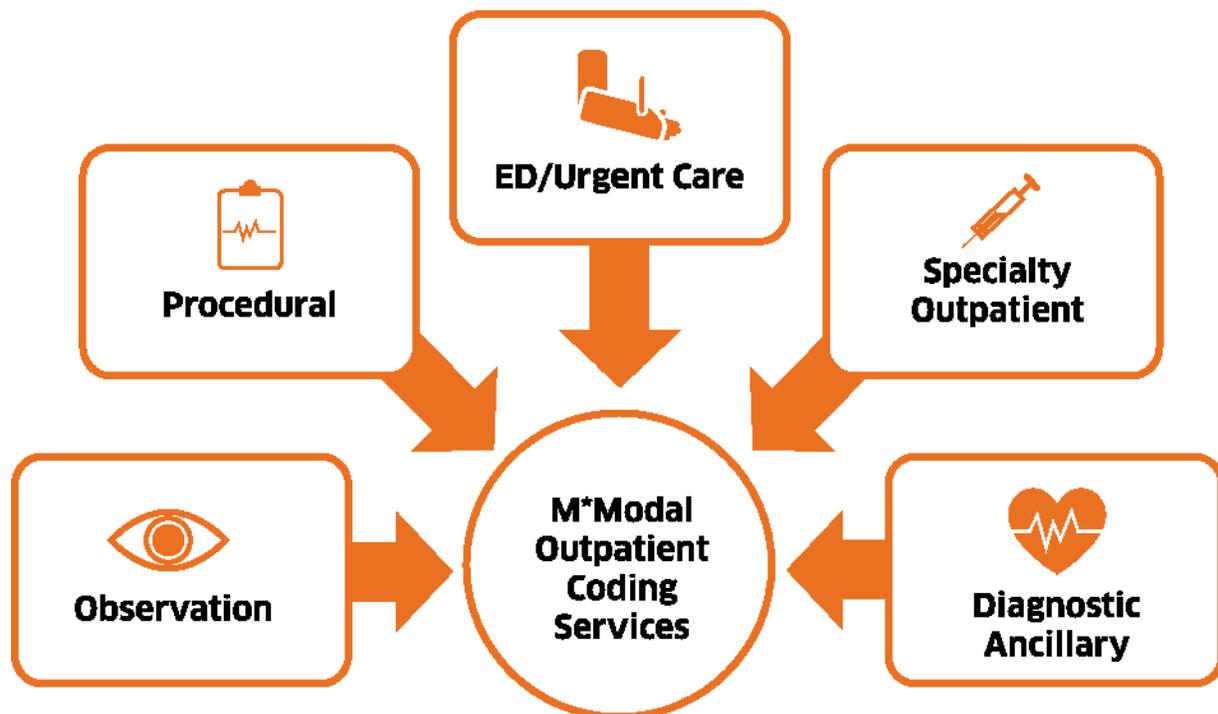

OUTPATIENT CODING SERVICES

As every HIM director is well aware, coding resources are in short supply. It's an ongoing challenge to stay ahead of coding demands. ICD-10 training and testing requirements along with dual coding demands are straining the capacity of most organizations, while the coding specificity required by ICD-10 will make maintaining high data quality standards even more critically important. With M*Modal Outpatient Coding Services, you can offload routine testing, expand your capacity, and move your experienced coding resources onto critical inpatient and/or ICD-10 preparation programs.

Our expert Outsourced Outpatient Coding Services are backed by our cloud-based clinical documentation platform, enabling our staff to deliver quality, compliant documentation and meet your coding throughput demands—promoting faster, more accurate revenue realization. This includes Observation, Procedural, Emergency Department(ED)/Urgent Care, Specialty Outpatient, and Diagnostic coding services.

M*Modal offers comprehensive Outpatient Coding Services that deliver quality, compliant documentation to meet your coding throughput demands.

As a full service provider, M*Modal also provides inpatient coding and interim HIM management staffing, education, and auditing services that can be on-site or remote to address short-term and long-term needs. A coding assessment from M*Modal can help you improve data quality today while preparing your coding team for the transition to ICD-10.

THE M*MODAL DIFFERENCE

- The largest transcription and coding services provider in the US
- One source for all of your coding services needs—staffing, auditing and education
- Proven partner in clinical documentation, providing coding services to organizations for nearly 20 years
- High-performance technology-enabled services organization that delivers quality services and fast turnaround times
- AHIMA credentialed coding experts
- Flexible service options—on-site, remote, domestic/global, short-term or long term

BENEFITS

M*Modal Outpatient Coding Services helps organizations:

- Support dual-coding efforts with overflow staffing
- Scale up to offset ICD-10 productivity impacts and demand spikes from third parties
- Reduce Discharged Not Final Billed (DNFB) and accounts receivable days
- Obtain appropriate reimbursement and reduce delays
- Eliminate staffing shortages and gaps in staffing
- Maintain coding productivity and cash flows
- Improve compliance and data quality
