

VIQ COURTS

Audio, Video and Evidence Solutions for the Courts

VIQ Solutions provides a complete, integrated digital audio, video and evidence capture and management workflow for the courts.

Our simple yet sophisticated software uses powerful database technology to take multi-channel digital court recording to the next level. Advanced features like indexed multimedia attachments, powerful search capabilities, integration with case management systems, multi-room monitoring and control, automated fixed/cloud centralized storage, and unmatched security let you control the capture, workflow and collaboration of your court's digital AV record.

VIQ is compatible with a wide range of video and audio capture hardware to give you the most flexibility. We provide the solution that's right for you, from a single camera and microphone to a country-wide installation of hundreds of courtrooms.

VIQ for Courts

More ways to capture...

Mobile

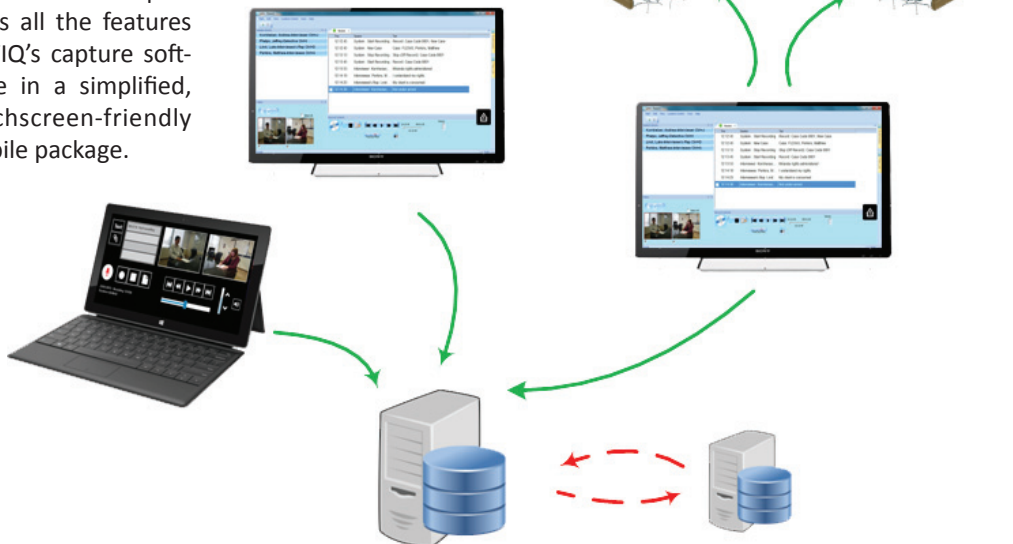

If your court is on the move, **VIQ Satellite's Simplified UI** provides all the features of VIQ's capture software in a simplified, touchscreen-friendly mobile package.

Fixed Room

VIQ Satellite's Advanced UI offers multi-channel synchronized audio and video capture and sophisticated playback and reporting functions.

Multi-Room

Larger courts can remotely monitor and control recording in multiple courtrooms simultaneously.

Optional Central Repository (Fixed or Cloud-based)
for centralized storage, redundancy, sharing and collaboration

Optional Integration with Case Management Systems

With VIQ, you can:

- **Attach other digital files:** Pictures, scanned documents, reports, and other evidence instantly becomes an indexed part of the record
- **Integrate with your Case Management system:** Copy data from your case management system for one-click customized recording
- **Transcribe your cases:** Authorized local or remote transcriptionists can access any file near-real time
- **Secure your recordings:** Robust security, user access controls and logging of all system activity protects your recordings and helps keep them tamper-free
- **Customize your system:** VIQ's extensive software profiles not only support multiple languages but also customer-specific nomenclature across all software

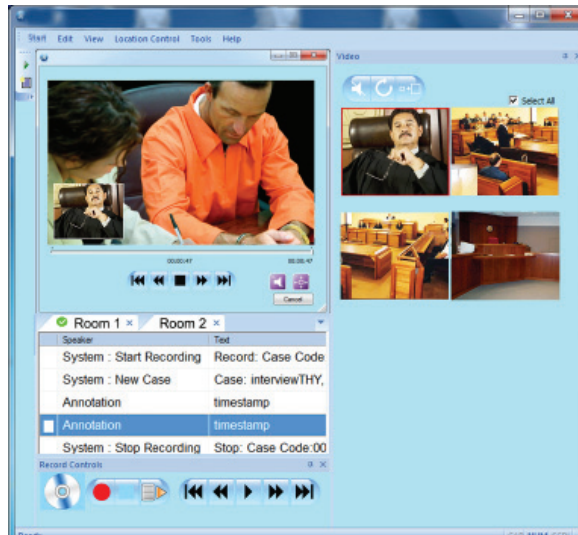

With all these great features, it's important to remember that the VIQ solution lets you start simple. You can start with a single courtroom and grow from there as your needs change.

VIQ Solutions provides a complete, integrated **digital audio, video and evidence capture and management solution** for the courts.

VIQ goes beyond the simple capture of courtroom audio and video. Our easy-to-use digital court recording solutions make it possible for you to share case audio, video and information across multiple locations, at the same time allowing you to conserve storage space and save on storage media. With integrated log notes, confidence monitoring and integrated playback and transcription capabilities, VIQ's digital court recording solutions can streamline your workflow and create an easy to use, accurate and secure record of all your proceedings.

VIQ Court Recording Software Offers:

- Multi-channel digital audio and video capture
- Optional integration with Case Management systems
- Scheduled, automated recording
- Sealed cases and password-protected "off the record" segments
- Indexed notes and multimedia annotations, including private notes for judges
- Secure, searchable database
- Automated synchronization across multiple network tiers for sharing and redundancy
- Customizable hotkey controls
- Complete transcription workflow
- Multi-room monitoring and recording control for larger courts
- Flexible audio and video hardware options
- Industry-leading security protocols and encryption

VIQ Satellite Advanced UI

Available Add-ons

Extend the power of your VIQ software with the following upgrades:

- **3rd Party Database Integration:** VIQ's Database Integration Tool can integrate your VIQ recording system with your 3rd party databases like Case Management systems, Docket Management systems, and more for the import, export and sharing of crucial information.
- **Remote Playback:** With VIQ Media Manager, you can easily access recordings for remote playback or transcription.
- **Web-based Access:** Secure online access to audio, video and notes for judges and admins through a standard web browser with VIQ AccessPOINT Portal.
- **Web-based Transcription:** VIQ's NetScribe provides an end-to-end web-based transcription workflow that gives instant access to recordings.

SYSTEM REQUIREMENTS

Recording Workstations (Multi-channel audio/video capture via external device)

- Windows 7 Professional, Ultimate, or Enterprise (SP1) (64 bit)
- SQL Server 2008 R2 Express with Tools (SP1) (64 bit)
- IIS 7.5 installed
- Intel Core i5 2.0 GHz (Core i7 3.0 Quad or higher if capturing video)
- 8GB RAM (12GB RAM min. if capturing video)
- High capacity 7200 RPM (min.) hard drive (Disk space depends on storage requirements)
- 1 GB network card (connected to a Gigabit switch)
- 1024 x 768 display resolution (32-bit color depth min.)
- WDM-compatible audio device for playback
- ASIO-based digital recording device or card. USB 2.0+ port or PCI slot may be required.

Tablets (Multi-channel audio/video capture via external devices)

- Windows 8.1
- 12GB RAM
- 256GB SSD or better
- i7 or better
- Network port
- Touch screen
- ASIO-based digital recording device. USB 3.0 port required.

iPhone (Single channel audio/video capture)

- iPhone 5S or better
- 64GB RAM or better

Servers

- Windows Server 2008 R2 Standard (SP1) (64 bit) or Windows 7.0 Professional (SP1) (64 bit)
- SQL Server 2008 R2 (SP2) (64 bit) or SQL Server 2008 R2 Express SP1) (64 bit) (Dependent on installation size)
- High-capacity fault-tolerant disk array (RAID 5) – SAN/NAS
- 8 GB RAM minimum (higher recommended)
- 1 GB network card (connected to a GB switch)
- Pentium Dual-Core Xeon processor

Contact VIQ for full list of compatible recording devices. Additional hardware may be required for video capture.
