Van Ausdall & Farrar, Inc. Deploys Advanced Managed Browser Security to Protect Clients from Human Error and Online Threats

Leading MTSP Introduces Revolutionary Web Protection That Keeps Organizations Secure, Productive, and Free from Digital Risk

INDIANAPOLIS, IN – October 27, 2026 - Van Ausdall & Farrar, Inc, a leading managed technology services provider (MTSP), announced today the rollout of a cutting-edge browser security solution designed to dramatically reduce cybersecurity risks with its advanced managed browser security. With "human error" still being the #1 cause of data breaches in small to mid-sized businesses, organizations are looking for ways to reduce this liability by preventing employee mistakes from occurring in the first place with web-safe tools and Van Ausdall & Farrar, Inc's latest advancement is helping to accomplish just that.

Van Ausdall & Farrar, Inc's "safe browsing" experience gives organizations the ability to proactively block malicious content, phishing sites, and harmful web destinations before they ever reach employees, making it a powerful, preventative first line of defense. Strict filtering enables employees to freely utilize the power of the internet, artificial intelligence (AI) and key software without incurring unnecessary organizational risk. While many organizations' first line of defense is complete reliance on everyone's constant vigilance, Van Ausdall & Farrar, Inc's safe browser complements that awareness with a tool that scales and operates autonomously.

"The web browser is the most used and most vulnerable tool in any organization," said Guillermo Fernandez, VCIO at Van Ausdall & Farrar, Inc. "While phishing emails are sometimes easier to detect, this technology allows us to protect our clients from the vast majority of web-based threats without relying on every individual employee to make the right call every single time."

Domain Name System (DNS) filters out dangerous websites, downloads, and suspicious content. It quietly works behind the scenes, preventing access to risky destinations while allowing safe, approved content to load without interruption, so team members can research, collaborate and grow without risking organizational credentials.

While "safe browsing" is one of the main features of this technology, there are several other aspects of Van Ausdall & Farrar, Inc's broader push to enable proactive, preventative cybersecurity within small to mid-sized organizations.

- **Web Threat Prevention:** Automatically blocks access to malicious or inappropriate websites, phishing scams, and domains associated with malware or ransomware.
- **Human Error Protection:** Removes the guesswork from employee decision-making by filtering threats before they appear in the browser.
- **Password Management & Credential Safety:** Ensures company logins are securely stored and managed, reducing the risk of password reuse or accidental credential exposure. The password manager eliminates password reuse across apps and keeps credentials secure even on shared devices.
- **Distraction Reduction & Productivity Boost:** Helps organizations control which websites are accessible, limiting access to non-work-related content that impacts focus.

As organizations grow increasingly dependent on cloud-based platforms and web apps, secure browser environments are no longer optional—they're essential. From protecting sensitive data to reducing the likelihood of ransomware attacks, this technology acts as an invisible but

essential layer of armor around the modern workplace.

"You can't rely on employee training alone to prevent every mistake," added Fernandez. "While education is also necessary, we've seen that the most effective security should be automatic, non-invasive, and effective. That's what we're offering our clients now—a tool that protects their business without slowing them down."

ABOUT Van Ausdall & Farrar, Inc.

Van Ausdall & Farrar, Inc. is a 112 year old Indiana-based company whose mission is to provide value-driven technology solutions while delivering a world class customer experience and having a positive impact on the communities we serve. Bottom line, our vision is to implement technology to improve the human experience. We are an innovative provider of custom IT, security, communications, compliance and automation solutions. Offering advanced technology know-how, Van Ausdall & Farrar brings innovative IT, workspace, cloud performance and hybrid solutions that help businesses simplify and leverage technology to meet specific objectives.
